You will be shown how to distinguish between the nature of parametric and non-parametric data and helped to understand when and why one should apply inferential statistics. Throughout the course you will be guided on how you can test and analyse these data sets by means of commonly used statistical techniques using freely available statistical software. We will work with Microsoft Excel Data Analysis Toolpak and BlueSky Statistics.

In all sections of the module, you will be provided with introductory material and/or reading, retrieval practices and practical assignments using the data provided and software downloaded.

## WHAT WE EXPECT

- Participation in at least 6 out of 8 Zoom sessions
- Completion of the activities and assignments on Moodle

## REQUIREMENTS FOR REGISTRATION

- Reliable knowledge of quantitative research methodology in general
- At best certified completion of the DIGI-FACE course Quantitative Research Methodologies I

The course content takes into account the diverse contexts in which supervisors work as well as the differences in the postgraduate supervision processes across different disciplines. The pedagogical approach of this online course draws on participant interaction with the online interface, participant reflexivity to enable learning from one's own and each other's supervision experiences and reading of relevant postgraduate supervision related research.

The course consists of self-directed learning on the Moodle platform and eight Zoom sessions.

## WHAT WE EXPECT

- Participation in at least 6 out of 9 Zoom sessions.
- Completion of the activities and assignments on Moodle.

## REQUIREMENTS FOR REGISTRATION

- A PhD degree.
- At least three years of supervision experience.
