

**FINAL OPPORTUNITY
FOR THIS COURSE**

AI in Education

Register Now

**New and previous
participants welcome.**

**This module is for
academics, media and
technology personnel who
want to explore how AI is
reshaping education and
reflect on how you could
respond critically or
reimagine educational
practices.**

ZOOM SESSIONS

TUESDAY 9 JUNE 2026 – 11H00
TUESDAY 30 JUNE 2026 – 11H00
CENTRAL AFRICAN TIME

This course investigates how artificial intelligence is transforming education - what we teach, how we teach, and how we learn. It is tailored for educators, students, support staff, and education professionals seeking to understand and respond to the rapid changes AI brings to the classroom and beyond.

Participants will gain foundational knowledge of AI and generative AI, explore real-world uses in educational settings, and grapple with the ethical and professional implications of these technologies.

By the end of the course, learners will be able to explain key AI concepts, assess its role in learning environments, evaluate ethical challenges, and consider its influence on teaching practices, student engagement, and institutional strategy.

Structured across three weeks (approximately 4 hours of learning per week), the course includes interactive activities, practical applications, and global peer discussions to encourage critical reflection and shared insight.

WHAT WE EXPECT

- Full participation in tasks and meetings
- Engagement with the material provided

WHAT YOU GET

- A DIGI-FACE certificate after successful completion
- The opportunity to be part of a course on AI in Education developed by King's College London

Ready to apply? Please apply via the online form here:
